PROFESSIONAL SUMMARY

Software Engineer experienced in building and managing web systems, focused on creating secure, reliable user experiences with a human touch. Growing into cybersecurity with a special interest in OSINT. My purpose is to turn technology into a bridge of service, connecting technical solutions with real impact in both professional projects and social and tech volunteering initiatives.

PROFESSIONAL EXPERIENCE

Frontend Developer *Nov 2025 – Mar 2026 · 5 months*

No Country

- Coordinated the visual and data integration between the Talent and B2B platforms, delivering smooth, user-centered navigation.
- Designed the architecture and interface of a scalable CRM tool, improving efficiency and information management.
- Implemented fast-loading solutions, dynamic image generation and a CMS, improving the platform's performance and maintainability.

Frontend Developer *Jun 2025 – Aug 2025 · 3 months*

No Country · Client: Dislexia & Conducta

- Led the redesign of Play Attention Argentina, improving the site's visual quality and usability.
- Built mobile- and SEO-optimized email templates and landing pages, including the Dislexia&Conducta project.

Web Development Intern *Jul 2022 – Dec 2022 · 6 months*

Catu Supermercados

- Updated and managed e-commerce content, syncing it with social media to expand digital reach.
- Built an internal web app that automated the tracking and issuing of promotional coupons.

VOLUNTEER EXPERIENCE

Digital Transformation Volunteer *Jul 2025 – Jun 2026 · 1 year*

Salud Mental Ecuador

- Drove process automation and digital transformation, increasing operational efficiency and fostering innovation within the organization.
- Built mobile app features, integrating virtual reality to enrich the user experience.
- Implemented and managed the organization's website, handling its ongoing updates.

Technology Volunteer *Feb 2022 – Nov 2022 · 10 months*

Alerta Ralse EC – Fundación GRUPO FULLEF

- Led social projects applying methodologies for the identification, design, monitoring and evaluation of social development initiatives.
- Designed and built a web system to support missing-person searches, improving the traceability of managed cases.
